- Technical Expertise
- Problem Solving
- Collaboration
- Attention to Detail
- Creativity
- Communication
- Communication Skills
- Time Management

Languages

Greek: Native Speaker

English: Native (proficiency)

As a Full Stack Web Developer, I'm passionate about creating dynamic and impactful digital experiences. I primarily work with Laravel, Livewire, and Vue, and over the years, I've developed a strong expertise in building robust web applications that really make a difference.

I love the challenge of integrating front-end and back-end technologies to craft seamless user experiences. I'm all about clean code and elegant design, and I thrive in collaborative environments where I can bring my problem-solving skills to the table.

I'm excited about the opportunity to contribute my skills and help drive innovation within your organization!

Experience

07/2022 - Current
Professional Services Solution
Full Stack Web Developer

- Built an in-house application that empowers our team to manage their data effectively. This full-stack tool allows users to enter, visualize, and analyze data through interactive charts, making it a crucial resource for our operations.
- Using Laravel and Livewire, I designed a robust architecture that ensures everything runs smoothly and scales with our needs. Docker helped streamline the deployment process, so we could manage everything seamlessly, from the web servers to the databases.
- I also created a secure API that connects our tool with various internal systems, enhancing its functionality and facilitating data exchange. Collaborating closely with designers and product managers, I focused on capturing user needs and delivering a solution that truly makes handling data easier and more efficient. It's been fantastic to see the positive impact this tool has had on our team!

04/2021 - Current
Maledian Technologies
Founder

- Founded and operated Maledian Technologies, a successful freelance web development company specializing in creating dynamic and visually appealing websites for clients.
- Developed a diverse range of websites, including e-commerce platforms, portfolios, personal websites, and blogs, using the popular WordPress platform and Elementor page builder.
- Leveraged the powerful features and flexibility of WordPress to customize and tailor websites according to client requirements, ensuring a seamless user experience and visually stunning designs.
- Utilized Elementor, a user-friendly and intuitive page builder, to design and build websites with drag-and-drop functionality, allowing for easy customization and content creation.

09/2018 - 06/2022
Volopa Financial Services
Web Developer - Tech Lead

- Held a key role as a Software Developer at Volopa for 3 years and 10 months, contributing to the development of innovative software solutions.
- Progressed to the position of Technical Lead, demonstrating leadership skills in overseeing and guiding software development projects.
- Developed and maintained software applications using Laravel Lumen framework, leveraging its features to ensure efficient and scalable code.
- Utilized MySQL for robust database management, designing and implementing optimized database structures to support application functionality.
- Collaborated closely with cross-functional teams, including product managers and designers, to gather requirements and deliver solutions aligned with business objectives.
